

# Predict Rock Injectivity

Erwan de Boisjolly  
*Final project*

# Hydraulic Fracturation

- Shale gas
- Horizontal drilling
- Rock fracturation

# Drilling Process

- Drilling parameters
  - Weight On Bit
  - Rotation Per Minute
  - Torque
  - *etc*
- Time based data
  - 1 data point / 5 seconds  
(4 days of drilling)

# Data filtering

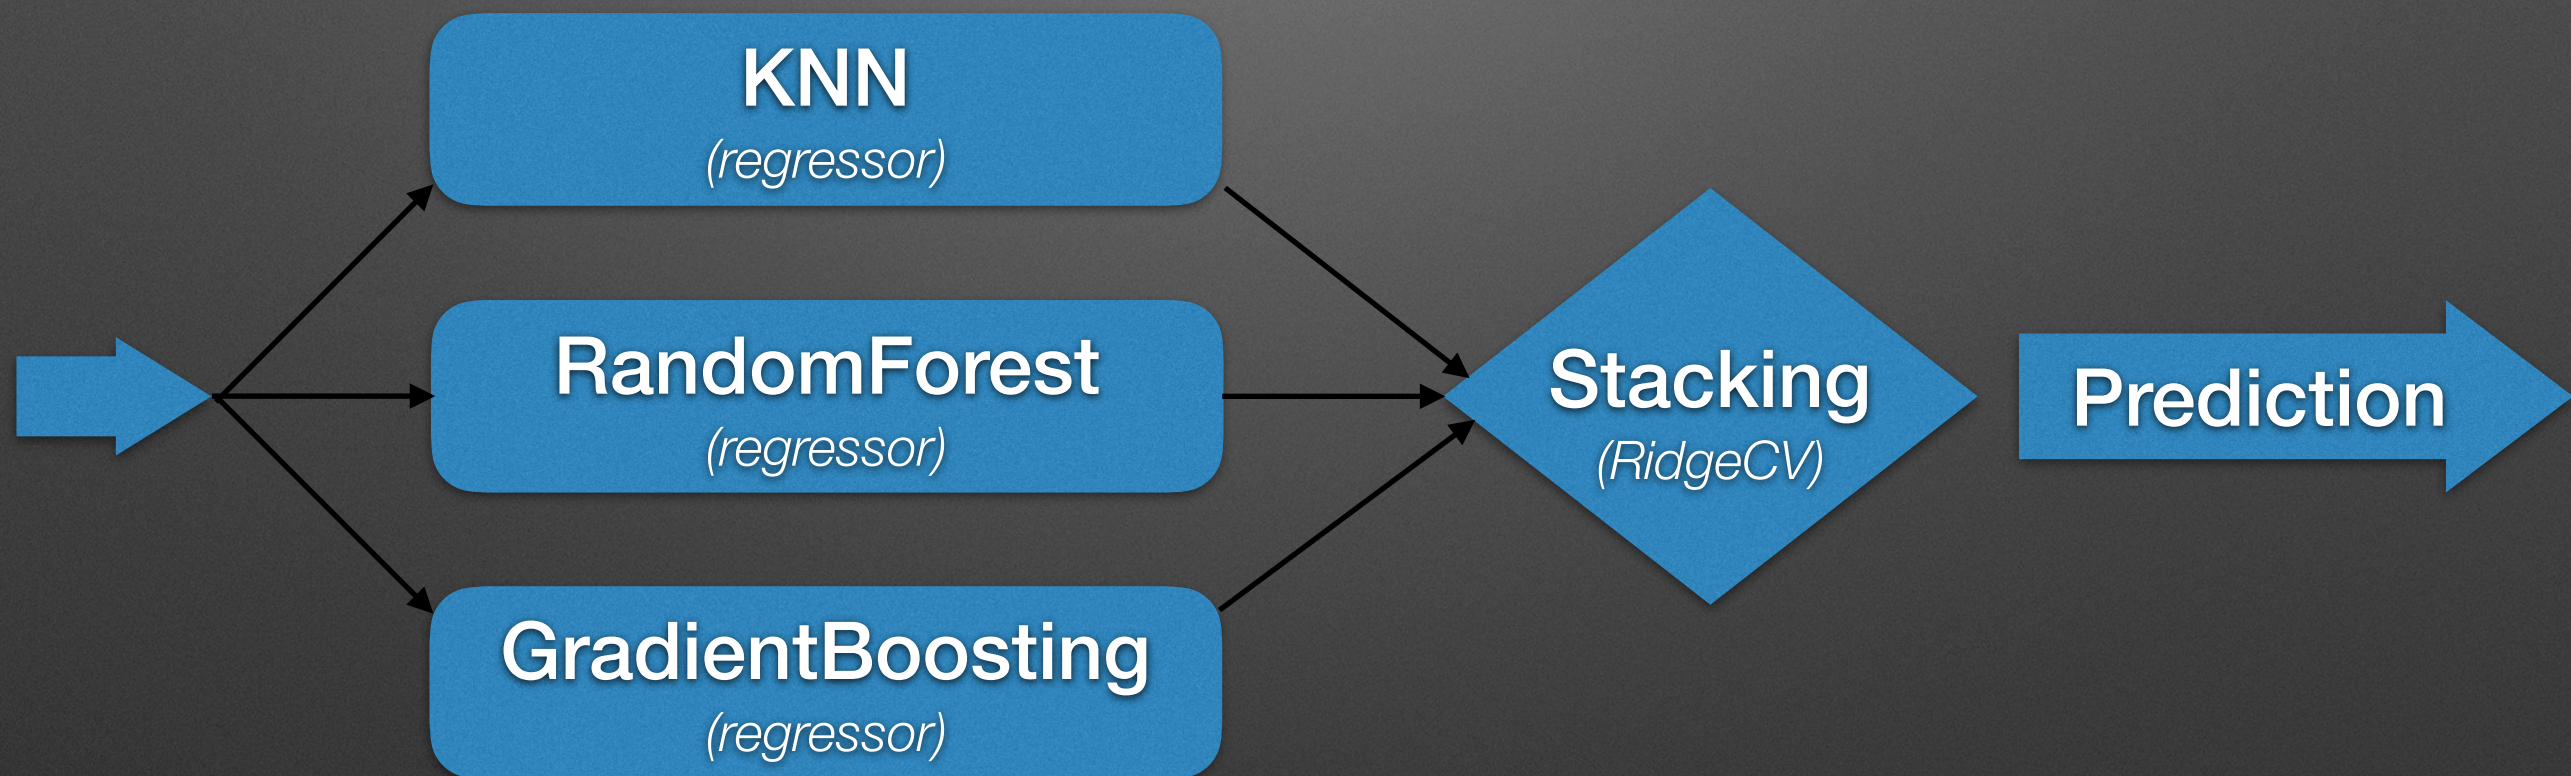

# Data Preprocessing

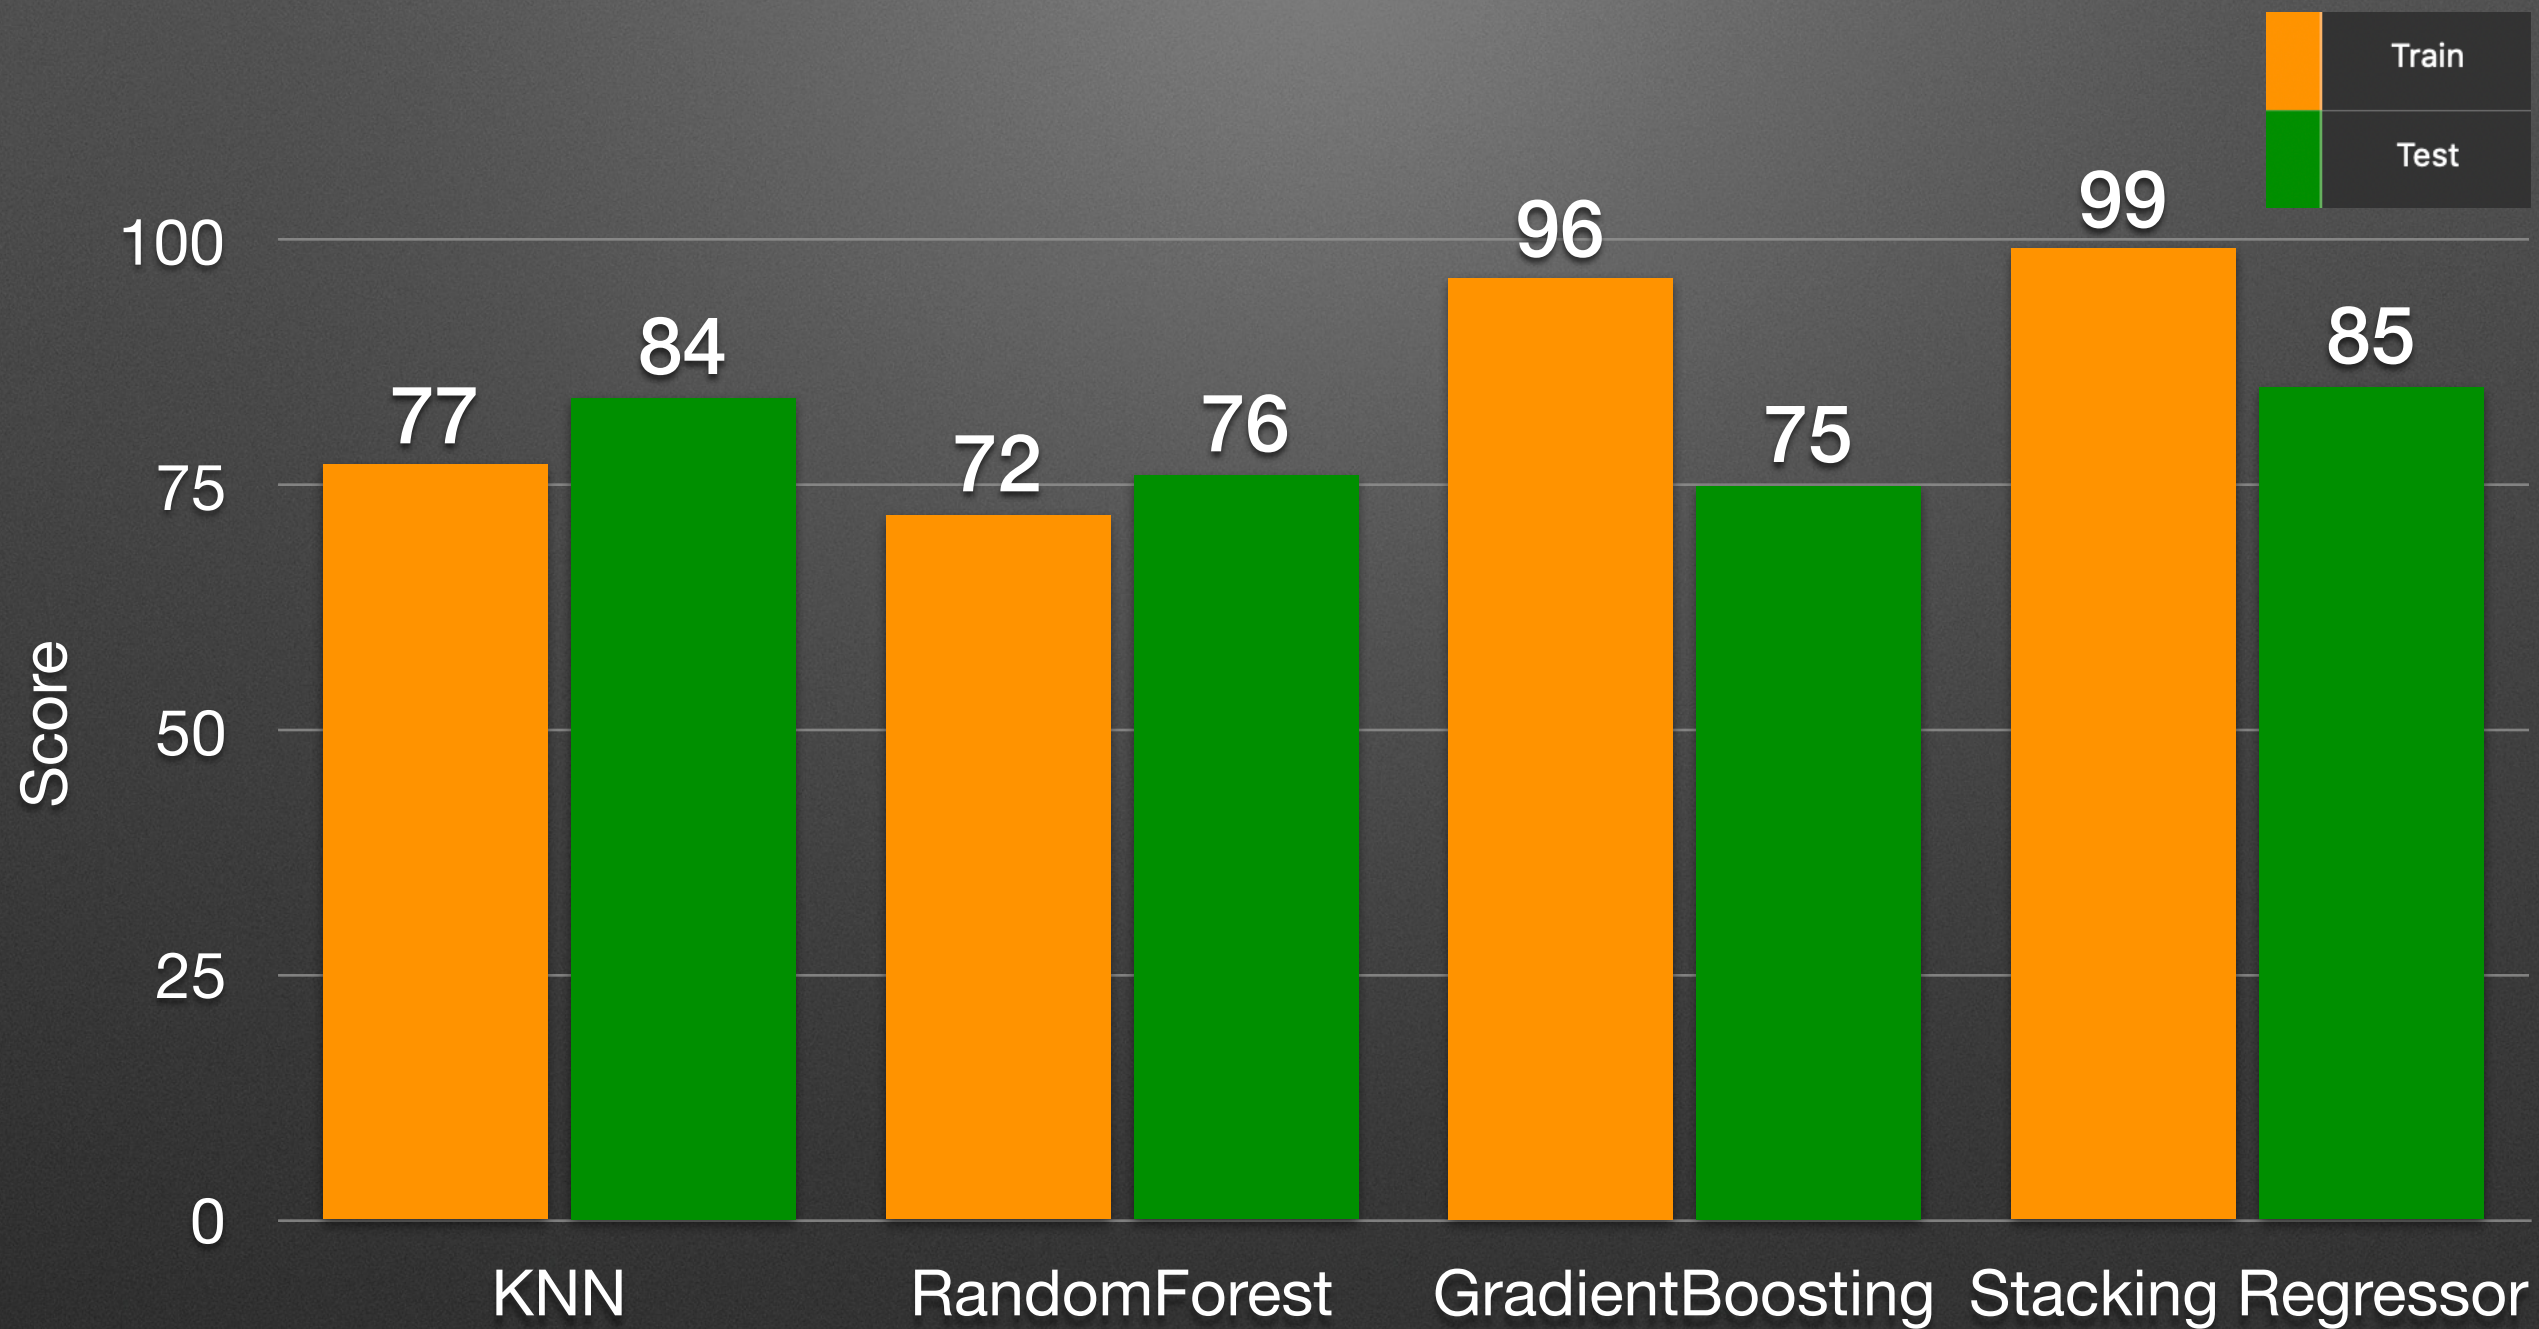

# Modeling

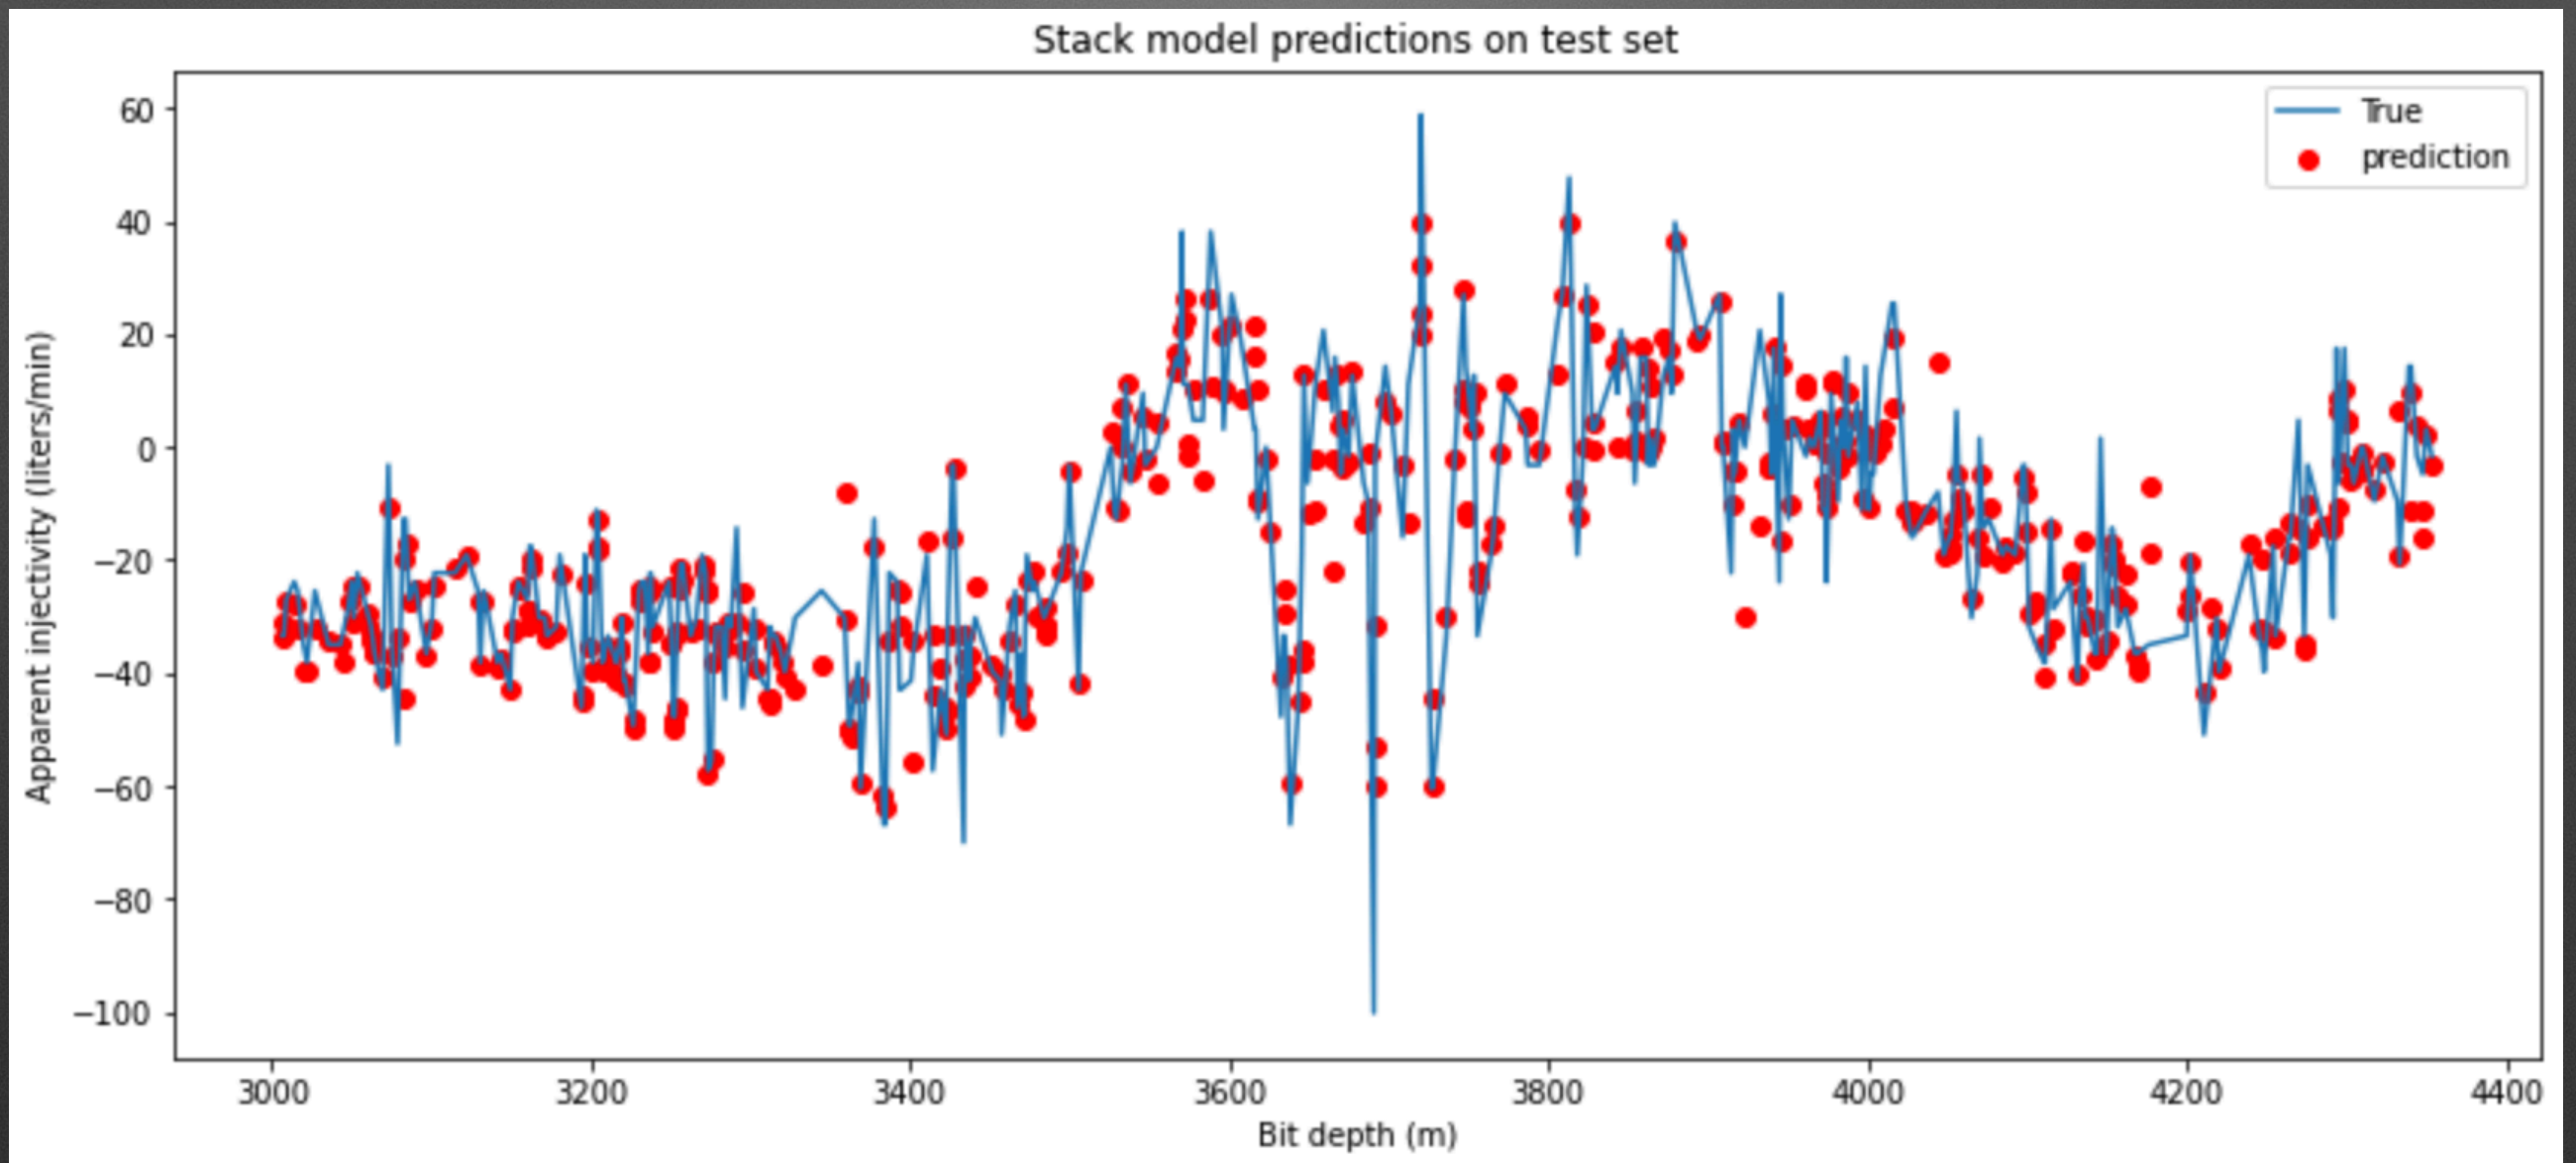

# Stacking Regressor

# Modeling results

# Cost savings

- Rig cost 125 k\$ / day

*=> log to acquire injectivity  
(‘labels’): 24h*

- Logging service
- Better production

# Thank you !
